

Temperature Calibration Laboratory

FAST, RELIABLE CALIBRATION WITHIN THE UK FOR DATA LOGGERS AND THERMOMETERS

Xylem Analytics UK are pleased to announce the opening of a new Temperature Calibration Laboratory based in Kent, UK.

Our new Temperature Calibration Laboratory offers fast, reliable and competitively priced calibration within the UK for our range of ebro data loggers, precision thermometers and food oil monitors. The Temperature Calibration Lab is also compatible with 95% of thermometers and data loggers from outside of the Xylem brands. Speak to us today to check compatibility and arrange calibration.

Monitoring the temperature and humidity of pharmaceuticals and other temperature-critical items in storage and transport is ebro's specialty and Xylem are harnessing that expertise in 2019 with the opening of its brand new Temperature Calibration Laboratory. The custom-built facility, housed within the UK headquarters, will offer inspection, repair, calibration and certification on a range of thermometers and data loggers - including non-Xylem product.

Who are ebro?

For 50 years ebro, a Xylem brand, has specialised in designing and manufacturing high quality thermometers and data loggers for use in many different applications within the industrial, medical, pharmaceutical and food & beverage industries - from simple catering instruments to complex wireless systems.

For more about ebro and its products and services visit our website or contact our customer support team.

Fast, reliable and competitively priced calibration within the UK for our range of ebro data loggers, precision thermometers and food oil monitors.

Why trust us with your calibration?

Nobody knows ebro product better than Xylem. Our experienced team have been working with ebro precision thermometers, data loggers and food oil monitors for over a decade and have a deep understanding of the products that is unmatched within the UK. Our new state-of-the-art calibration laboratory featuring precision water baths calibrated with certified thermometers, coupled with experienced, customer-focused technicians means your business assets are in safe hands.

Gold Service

We realise that time without your instruments is business lost, which is why our Gold Service guarantees a 3 day turnaround from the moment we receive your items. With our Gold Service you can be assured that your instruments will be returned to you with guaranteed readings as good as new.

Precision Thermometers for manufacturing and cold chain

- Simple certification for digital handheld core penetration thermometers
- Fixed price pre-validation test tiered to level of requirement
- Repairs
- Certification showing traceability to primary standard

Wireless Data Logger Systems

- Specialists in ebro EBI 25 calibration and certification
- Calibration and certification of other manufacturers standalone product with integral display
- Specialists in EBI 300 USB loggers

Data Loggers for validation of sterilisers and pasteurisers

- Specialists in EBI 10 EBI 11, EBI 12, EBI 16 (Bowie Dick) temperature data loggers
- Repairs
- Certification showing traceability to primary standard
- For Ebro loggers with or without an integral display
- For other makes of logger with an integral display

Temperature range:

-30°C to +250°C

Measurement Performance

± 0.1K
